Measurement technology - BioPhysik Technologie

With our products we offer solutions for a better living environment.

Our Measurement systems are used for the measuring of:

- radioactivity
- electro smog
- alternating electric and magnetic fields
- constant electric fields (electrostatic charges - electrostatics)
- geological disturbances and anomalies of the earth's magnetic field (constant magnetic field, modified earth rays- geographic faults or underground watercourse)
- geomagnetic disturbances
- medical bioresonance

Geo-Magnetometer BPT 2010

High-quality measuring device - for detection of anomalies of the earth's magnetic field and biologically significant site-related factors.

[Details and more product information >>](#)

Geo-Scanner BPT 3010

Basic computer as a professional measurement equipment in modular design - for locating biologically significant site-related factors.

[Details and more product information >>](#)

By default both basic measuring devices are available only with the Magnetic Probe 1-axis.

Accessories

Magnetic Probe 3-axis

Scintillation counter

R-Check

Field Mill
